EDUCATION

Duke University — Durham, NC — Expected May 2029
B.S., Computer Science & Visual Media Studies — *GPA: 3.7/4.0*

Springfield High School — Springfield, PA · *Valedictorian* — Jun 2025

EXPERIENCE

Duke Code+ — Software Developer — May 2026 – Jul 2026
Duke Center for Computational and Digital Health Innovation (DCCDHI) · Swift/iOS — *Durham, NC*

- Developed *Pulse*, an iOS app pooling wearable-device data for Dr. Amanda Randles' multi-institution health research
- Built a SwiftUI goal-setting feature turning tracked steps, distance, and sleep into daily/weekly targets
- Worked on the Python backend and database, and integrated its API calls with the SwiftUI frontend
- Engineered a streak-based engagement system (virtual pet + 30+ badges) to keep iOS background data collection running
- Co-built a moderation admin portal (Preact, FastAPI) behind Duke Shibboleth SSO, containerized in Docker
- Worked on a team of 4 with daily standups and a Git issue board; iterated on usability and accessibility feedback from ~10 testers (contrast, consent readability, VoiceOver)

Web Surfing Studios — Full Stack Web Developer Intern — Jun 2025 – Sep 2026
PMTron, a pre-launch AI project manager (pmtron.com) · Enterprise web apps & internal tools — *Remote*

- Built React frontend views and backend features on an ASP.NET MVC app during its migration to a database-first architecture
- Built Azure DevOps CI/CD pipelines deploying from Git to AWS Elastic Beanstalk across Dev, Test, and Prod environments
- Implemented end-to-end request correlation IDs to trace requests across services, improving logging and debugging
- Managed remote AWS RDS MySQL instances with Entity Framework migrations and environment-aware seeding tools
- Gated all new code behind AWS AppConfig feature flags with New Relic logging; automated LMS module assignment

DuQuantum — Web Developer & Designer — Jun 2026 – Present

- Wireframed in Figma and built the TypeScript frontend for Duke's inaugural quantum hackathon (100+ participants)

HackDuke — Graphic Design Executive — Fall 2025 – Present

- Wireframed the UI and user flows in Figma for the website of Duke's 500+ applicant hackathon for social good

Springfield Opticians — IT Support & Front Desk — 2021 – 2025

- Troubleshot equipment, set up the office network, and ran front-desk operations for a family-owned medical office

PROJECTS

HeirLoom — 3rd Place, Meta Challenge @ HackGT (800+ participants, 200+ teams) — Sep 2026
AI family-storytelling iOS app · Swift, SwiftUI, MapKit, FastAPI, MongoDB Atlas, xAI Grok · Team of 3

- Built the iOS client as animated, reusable SwiftUI components from my Figma designs, using Claude Code and Figma MCP
- Wrote a custom corkboard layout computing pin positions, card rotations, and Bézier twine curves legible at any zoom
- As integration lead, connected the client to teammates' real-time voice agent and FastAPI/MongoDB Atlas backend

SMS Phishing Detection Model — 1st Place CS + Judge's Choice, PA Junior Academy of Science — 2025

- Trained a Naive Bayes classifier on unigram/bigram features (regex preprocessing, tokenization, lemmatization) to label 5,171 SMS messages as spam or benign with 98% accuracy

Physics Education Simulation — 1st Place CS, PA Junior Academy of Science — 2024

- Built a Unity/C# simulation using rigidbody physics and hand-coded kinematics to teach intro-physics concepts

SKILLS

Languages: C#/.NET, Swift, TypeScript, JavaScript, Python, Java, C, SQL, HTML/CSS
Frameworks: ASP.NET MVC, Entity Framework, SwiftUI, React, Preact, FastAPI, Bootstrap, Windows Forms
Cloud & DevOps: AWS (EC2, RDS, S3, Elastic Beanstalk, IAM, AppConfig, Secrets Manager, SQS, SES), Azure DevOps
Data & Tools: SQL Server, MySQL, MongoDB Atlas; Git, Docker, Octopus Deploy, New Relic, Windows Server & IIS; Agile
